Om os

bygrowers dyrker ikke bare nogle af markedets bedste og mest holdbare planter - vi skaber vækst. I et tæt samarbejde med trendsættende virksomheder og forædlere i Europa, sikrer vi vores kunder et bredt og tidssvarende sortiment, hvor løbende produktudvikling og -forbedring er en selvfølge. Med os får kunderne en stærk partner, som har mere end 140 dedikerede medarbejdere, et samlet væksthusareal på 215.000 m² og en årlig produktion på mere end 30 millioner potteplanter.

bygrowers er MPS-GAP, MPS-ABC, MPS-SQ og GRASP certificeret, og efterlever derved nationale såvel som internationale krav med hensyn til blandt andet forbrug af energi, næring og pesticider samt affaldshåndtering. bygrowers har tidligere kun været kendt for produktion af færdigvarer, men blev med virkning fra 1. januar 2020 også leverandør af stiklinger og småplanter. Vi har overtaget forhandlingen af Osteospermum SUNNY på det skandinaviske marked med egen produktion af stiklinger i Vietnam. Osteospermum SUNNY er kendt som et af de stærkeste brands inden for kulturen Osteospermum, og i et stærkt samarbejde med Beekenkamp NL, vil Sunny forblive det absolut foretrukne brand i mange år fremover.

About us

bygrowers does not only cultivate some of the market's best and most durable plants – we also generate growth. We collaborate with leading trendsetters and cultivators in Europe to give our customers a wide and contemporary product range, where continuous product development and improvement are a matter of course for us.

What our customers get is a strong partner with more than 140 dedicated employees, an overall greenhouse area of 215,000 m² and annual production of 30 million pot plants, which makes us one of the largest nurseries in Denmark.

bygrowers is MPS-GAP, MPS-ABC, MPS-SQ, and GRASP certified, and thus complies with our customers' requirements for environmental employment, as well as quality conditions. We have previously only been known for the production of finished goods, but with effect from 1st of January 2020, we also supply cuttings and small plants. bygrowers has taken over the sale of Osteospermum SUNNY in the Scandinavian market, with own production of cuttings in Vietnam. Osteospermum SUNNY is known as one of the strongest brands in this culture, and in collaboration with variety owner Beekenkamp NL, Sunny will remain the absolute favorite brand for many years to come.

Osteospermum

FORMERING

Optimal temperatur er 16 - 18°C. Belysningen skal være let skygge med dagsforlængelse til 14 timer ved brug af kunstigt lys. Ved pladskalkulation forventes der ca. 500 stk/m^2. Formering foregår under plastik eller i tåge.

BESTILLING AF STIKLINGER

Stiklingeordrer bestilles direkte hos bygrowers A/S. Deadline for indsendelse af ordrer er fredag kl. 12.00 i 3. ugen inden leveringsugen. Bestillinger indsendes til Eva Lykke Jensen på eva@bygrowers.dk, hvorefter ordren bekræftes ASAP. Forespørgsler kan ligeledes indsendes til eva@bygrowers.dk. Stiklingerne leveres i poser á 50 stk. og transporteres med luftfragt i flykasser med isafkøling. Flykasserne kommer i størrelserne 52,5 x 37 x 11 cm med plads til 2 kassetter med hver 1000 stk. stiklinger eller 52,5 x 37 x 31 cm med plads til 6 kassetter med hver 1000 stk. stiklinger.

Sæson for Osteospermum stiklinger er fra august til maj.

DYRKNINGSVEJLEDNING

Optimal temperatur for rodede stiklingeordrer er mellem 16-18°C. Belysning skal være let skygge med dagsforlængelse til 14 timer ved brug af kunstigt lys. Ved pladskalkulation forventes der ca. 500 stk/m2. Den rodede stikling afhærdes ved fjernelse af plastik efter ca. 14 dage, som erstattes med akryl og holdes fugtigt. Akryl lægges over inden topning. Den rodede stikling toppes efter 3. bladsæt i 4. uge. Vækstretardering Kompakt.

BESTILLING AF RODEDE STIKLINGER

Rodede stiklingeordrer bestilles ligeledes hos bygrowers A/S. Deadline for indsendelse af ordrer er fredag kl. 12.00 i 7. ugen forinden leveringsugen for utoppede ordrer og i 8. ugen for toppede ordrer. Bestillinger og forespørgsler indsendes til Eva Lykke Jensen på eva@bygrowers.dk, bekræftelse og svar returneres ASAP. De rodede stiklinger leveres i 84 huls plant paper bakker i 30 mm plugs klar til potning. Antal per container uden forlænger er 36 x 84 huls bakker ved utoppede ordrer og 44 x 84 huls bakker ved toppede ordrer. Antal per contain med forlænger er 44 x 84 huls bakker ved utoppede ordrer og 56 x 84 huls bakker ved toppede ordrer.

Sæson for levering er september til juni.

PROPAGATION

Optimal temperature is 16 - 18°C. Light must be slightly shade with day extension to 14 hours by artificial light. Space calcuation is expected to fill in 500 pcs/m^2. The propagation is executed under plastic or in fog.

ORDERING OF UNROOTED CUTTINGS

Unrooted cuttings are ordered directly with bygrowers A/S. Deadline for issuing orders are Friday at 12 PM the 3. week in advance of the delivery week. Orders can be forwarded to Eva Lykke Jensen at eva@bygrowers.dk and hereafter an orderconfirmation will be issued. Any inquiries can also be emailed at eva@bygrowers.dk. The unrooted cuttings are delivered in bags of 50 cuttings and are transported by air freight in flight boxes with ice bags. The flight boxes are available in the dimensions 52,5 x 37 x 11 cm divided into 2 inner boxes with a 1000 cuttings or 52,5 x 37 x 31 cm divided into 6 boxes with a 1000 cuttings.

The season for Osteospermum cuttings runs from August to May.

CULTIVATION GUIDE

Optimal temperature is 16-18°C. Light must be slightly shade with day extension to 14 hours by artificial light. Space calculation is expected to fill in 500 pcs/m^2. The rooted cutting is hardened by removal of plastic and replaced with acryl and kept moist. Acryl is applied before pinching. The rooted cutting is pinched above the 3. leaf pairs in 4. week. Growth retardent Kompakt.

ORDERING OF ROOTED CUTTINGS

Rooted cuttings are ordered directly with bygrowers A/S. Deadline for issuing unpinched orders is Friday 12 PM the 7. week in advance of delivery and for pinched orders the 8. week in advance of delivery. Any inquiries and orders can be emailed at eva@bygrowers.dk and confirmation or answer will be replied ASAP. The rooted cuttings are delivered ready for potting in 84 units plant paper trays in 30 mm plugs. Quantity per container without extension is 36 x 84 hole trays for unpunched orders and 44 x 84 hole trays for pinched orders. Quantity per container with extension is 44 x 84 hole trays for unpunched orders and 56 x 84 hole trays for pinched orders.

Season of delivery is September to June.

FAKTA

Pelargonium er en planteslægt, som stammer fra Sydafrika, hvor de gror vildt. Planten tåler tørke og varme på grund af dens naturlige habitat, men ikke frost. I 1700-tallet blev pelargonien hentet til Europa og i dag har det udviklet sig til hundredevis af arter og tusindvis af sorter. De mest kendte varianter er dem, som kendes under navnet "Zonalegruppen", som i store træk, er udviklet fra Pelargonium Zonale og Pelargonium Inquinans.

Vedbendbladede pelargonier stammer hovedsagelig fra Pelargonium Peltatum og de franske pelargonier er udtrukket fra Pelargonium Cucullatum og Pelargonium Grandiflorum. De duftende pelargonier kaldes for det meste "duftgeranier" og de fleste af disse stammer fra Pelargonium Graveolens. I 1950'erne voksede populariteten dog yderligere, da Dronning Ingrid bringer nogle Zonale Pelargonier fra Sverige, kaldet Mobakkere til Gråsten Slot. I Danmark bliver denne pelargonie herefter kaldet "Dronning Ingrid". Zonale pelargonier er en hybrid, og meget dekorative med pletter og zoner, deraf navnet.

FACTS

Pelargonium is a plant genus that originates from South Africa, where they grow wild. The plant can withstand drought and heat due to its natural habitat but not frost. In the 18th century, the geranium was brought to Europe and today it has evolved into hundreds of species and thousands of varieties. The most well-known variants are those known as the "Zonal Group", which mostly are developed from Pelargonium Zonal and Pelargonium Inquinans.

Ivy leaves geraniums originate mainly from Pelargonium Peltatum and the French geraniums are extracted from Pelargonium Cucullatum and Pelargonium Grandiflorum. The fragrant geraniums are mostly called "fragrance geraniums" and most of them originate from Pelargonium Graveolens. In the 1950s, however, popularity is growing further as Queen Ingrid brings some Zonal geraniums from Sweden, called Mobakkere to Gråsten Castle. In Denmark, this pelargony is then called "Queen Ingrid". Zonal geraniums are a hybrid, and very decorative with spots and zones, hence the name.
